Dear recruiter,

I'm Azzar Sarikhani, 34 years old, and I am a junior frontend web developer with skills in JavaScript, CSS, and HTML. I am interested in React.js and developing web pages with react.js, I am also interested in backend development and would love to extend my knowledge in this area. I have a bachelor's degree in applied mathematics from Alzahra university in Tehran, Iran. At university we mainly learned the basics of programming with C, and C++ for our programming courses. And I passed all my programming courses with flying colors. I am always studying and learning new developing techniques. At the moment I am working on my frontend development skills by taking courses on Pluralsights. I upload my codes and my projects on my Github page, the link to which could be found in the contact section of this letter. I love problem solving specially if it is a logical problem that needs to be solved.

My previous work experience consists of working as a restaurant cook between Jan 2020 to April 2022 in a few different restaurants in Helsinki and Espoo. I also have a restaurant cook degree from Perho culinary school in Helsinki. Prior to that I mainly worked in education sector as an English language teacher in Iran and Finland, and English to Persian translator -including the translation of 2 books, published in my hometown Tehran, Iran.

I am self-motivated, I started translating from English while I was learning English myself. I am a quick learner; I speak Finnish to a satisfactory level. I am very sociable, I always smile and I make friends everywhere I go. I am known to be a problem solver and a team leader who enjoys working within a group. I am self-initiative, if something needs to be done, I am always the first one to volunteer to do it, and I am not afraid of getting my hands dirty. In Finland, I have done an internship job in a Finnish day care as a part of my Finnish language studies. And I have also worked as an afternoon English club teacher, teaching English to kids in both Finnish and Swedish daycares and schools for about 2 years. In my free time, I do gardening, and I also love cycling and going for long walks. Please do not hesitate to ask any questions. I would love to come by and talk more about myself and my work.

Sincerely, Azzar Sarikhani
